

LOCKING PLIERS & CLAMPS

Grip Wrench 5" - Curved Jaw 06600100

Grip Wrench 10" - Curved Jaw 06600300

- General purpose curved jaw Grip Wrenches for a wide variety of applications
- Narrow profile, large opening, curved shaped jaws
- Provides firm grip on all round shapes

Reference	Length - ins / mm	Capacity	Weight
06600100	5" / 135mm	0 - 30mm	180g
06600300	10" / 235mm	0 - 63mm	600g

Omnium Jaw Grip Wrench - 7" 06600800

Omnium Jaw Grip Wrench - 10" 06600900

- Unique multipurpose jaw configuration, combining Straight, Curved and Convex jaw profiles
- Modern design of jaw profile is ideal for all trades ; eg welding, automotive, plumbing, DIY etc
- Securely grips a wide variety of shapes, including round, flat, large size objects

Reference	Length - ins / mm	Capacity	Weight
06600800	7" / 200mm	0 - 40mm	410g
06600900	10" / 235mm	0 - 60mm	630g

Hose Clamp Grip Wrench 10" 06601200

Hose pinch-off clamp Grip Wrench
Instant clamping of hoses without risk of damage
Ideal for brake, fuel, cooling system hoses, and small pipes up to 30mm diam.

Reference	Length - ins / mm	Capacity	Weight
06601200	10" / 235mm	30mm max	380g

Set of 5 Grip Wrenches 06600000

Contents:

- 1 x 06600100 Curved Jaw Grip Wrench 5"
- 1 x 06600300 Curved Jaw Grip Wrench 10"
- 1 x 06600800 Omnium Jaw Grip Wrench 7"
- 1 x 06600900 Omnium Jaw Grip Wrench 10"
- 1 x 06601200 Clamp Jaw Grip Wrench 10"

Ergo Grip - Grip Wrench Locking Plier 06602700

Unique 'pistol-grip' locking plier, specially designed to reduce stress on wrist and forearms. One hand control for release, adjustment, and application

- 2 in 1 Pliers and Locking Pliers
- 50% more force in twisting applications
 - more comfort, less fatigue
- Jaw Opening : 0 - 40mm

Sheet Metal / Welding Clamps

Robust pressed steel construction grip-wrench style clamps with chrome finish
All models feature an adjusting screw and quick release lever

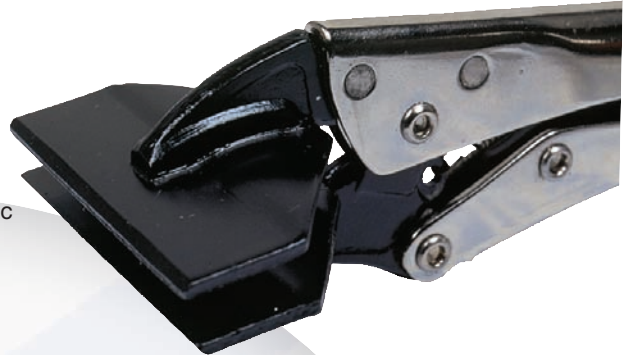

Sheet Metal Locking Clamp

06500800

Wide jaw locking clamp for holding sheet steel and body panels

- Powerful grip makes light work of squaring templates and forming corners etc
- Jaw width - 75mm

Reference	Length	Jaw Width	Max Opening	Weight
06500800	200mm	75mm	30mm	0.575kg

Welding 'C' Clamp - 11" (275mm)

06501100

Large capacity deep throat clamp, with small gripping area, for awkward shapes and access

- Suitable for holding together sheet metal, body panels and other materials.
- Powerful grip and deep throat ideal for handling awkward shapes encountered when welding, glueing, marking off and template making
- Small gripping area allows close up working and deep throat enables access around bulky and awkward shapes eg. door sills

Reference	Length	Jaw Opening	Jaw Width	Throat Depth Closed	Weight
06501100	280mm	0 - 90mm	55mm	80 - 150mm	0.90kg

Welding 'C' Clamp - 18" (487mm)

06501400

- Suitable for holding together sheet metal, body panels and other materials where access is restricted.
- Powerful grip and deep throat ideal for handling awkward shapes encountered when welding, glueing, marking off and template making
- Small gripping area allows close up working and deep throat enables access around bulky and awkward shapes eg. door sills

Reference	Length	Jaw Opening	Jaw Width	Throat Depth Closed	Weight
06501400	495mm	300mm	250mm	165 - 405mm	1.90kg

Welding Clamp

06501200

Split jaw locking clamp providing maximum access to working area

- Deep throated locking clamp suitable for holding together sheet metal, body panels and sills whilst welding.
- Powerful grip, deep throat and split jaws give maximum visibility and access to working area

Reference	Length	Jaw Opening	Jaw Width	Throat Depth Closed	Weight
06501200	265mm	63mm	75mm	30mm	0.75kg

Axial Grip Welding Clamp 'L' Shaped Jaw

06502000

- Thin jaw flat axial grip welding clamp, suitable for holding body panels, sills.

Reference	Length	Jaw Opening	Jaw Width	Throat Depth	Weight
06502000	215mm	0 - 18mm	18mm	15mm	0.14kg

Axial Grip Welding Clamp - Restricted Access - 'J' Shaped Jaw

06502500

- Thin jaw, restricted access axial grip welding clamp, suitable for holding wheel arches, apex panels and lipped edges.

Reference	Length	Jaw Opening	Jaw Width	Throat Depth	Weight
06502500	220mm	0 - 18mm	18mm	15mm	0.40kg

Axial Grip Welding Clamp - Wide Jaw - 'W' Shaped Jaw

06503000

- Wide jaw flat axial grip welding clamp, with specially designed 'W' shaped head suitable for holding long body panels and sills.

Reference	Length	Jaw Opening	Jaw Width	Throat Depth	Weight
06503000	195mm	18mm	56mm	36mm	0.50kg

Micro Welding Clamps - pack of two (2)

06503500

- Compact lightweight aluminium clamps that are lightweight and strong.
- Ideal for hard to get at places.
- Quick and easy to use - ideal for wheel arch repairs, door alignment and headlamp panels.

Reference	Length Closed	Length Open	Max Jaw Opening	TMax Clamping
06503500	92mm	100mm	20mm	11mm

Plug Weld Pliers

06505000

Special welding clamp for use while MIG welding

- Eliminates 'burn-thru' on thin panel work
- Copper alloy pad - low affinity to molten weld, and has good heat dissipation properties
- Prevents adhesion to the weld
