

Infra-Red Laser Tachometer 30043000

Non-contact Infra-red Laser Tachometer for measuring RPM on rotating shafts, pulleys wheels etc.

Laser picks up signal from reflective tape which is placed on the rotating shaft. Accurate to 0.1 RPM and will measure up to 99,999 RPM

Features

- Bright and powerful laser optical system allows for easy targeting of rotating shafts, wheels, pulleys, etc, even in bright daylight.
- Measurements can be obtained from safe and comfortable distances - from 5 to 50 cm.
- The large 5 digits display allows measurements without the need to switch scales or multiply reading ranges.
- Unit comes complete with batteries, reflective tape and soft carrying pouch

Dual Laser Infra Red Thermometer 30044000

A high precision non-contact thermometer with dual laser beams that are targetted on a single spot - ensuring optimum distance from object for accurate temperature measurement

Features

- Backlit LCD display
- MAX temp display
- Automatic data hold and display resolution
- High & Low temp alarm setting
- Ideal for air con, cylinder temp, brake temp, cooling system, exhaust cat etc

Digital Diesel Fuel Pressure Meter 30072500

Features

- Uses voltage to measure the High Pressure from the common rail pressure sensor
- Converts signal to PSI and BAR
- Pressure Range 0 - 1500 BAR
- Works on 12v supply
- Ideal for making comparative pressure tests against ECU readings and against actual rail pressure

N.B. Included in Common Rail High Pressure Test Kit (31465000)
See page 32 for details

HT Tester Sets 30070100

Set of 4 neon testers for connection between spark plugs and HT leads

- Provides a visual check for detecting HT signal
- Snap-fit connections for ease of use

Sonoscope 32370000

A super sensitive sound detector, with a built-in diaphragm which amplifies noise, for assisting in the diagnostic process. Robust metal and plastic construction, with 550mm hose, and 290mm probe

Helps to diagnose many vehicle problems, including :-

- Noisy water pumps
- Faulty wheel bearings
- Alternator and power steering problems
- Air conditioning compressor bearings
- Camshaft and crankshaft knocks
- Noisy tappets etc
