

Hydraulic Thin Jaw Gear & Bearing Pullers

Specially designed leg jaw profile, for pulling tasks where there is limited clearance behind the component to be removed. The jaw profile also features a wider load bearing surface than standard puller legs in order to provide secure grip.

Thin jaw pullers are available with either mechanical or SP 1500 Series hydraulic power.

Standard jaw profile designed to grip tighter as pressure is applied

Thin jaw profile designed for limited access and secure grip

860 Series - Two Leg Mechanical Thin Jaw Gear Pullers

For details of individual puller components, please refer to pages 26-27

Mechanical Thin Jaw Gear Puller Set 08650400

supplied in steel case

- Contains component parts to make 7 separate 2 or 3 leg pullers, as per the table below:

REFERENCE	SPREAD ins	SPREAD mm	REACH ins	REACH mm	FORCE SCREW mm	TYPE
08600000	3	75	3	75	12 x 150	2 leg
08610000	6	150	6	150	24 x 225	2 leg
