Certain vehicle models require Model Specific sets of Press Pieces
due to the specific design of the vehicle components.

The following Individual Press Piece sets have been developed for
such circumstances, and should be used in conjunction with the
Universal Press Frame (18700000) or Universal C Clamp (18780200)

BMW E36 / E46 Rear Suspension Bushes

18720100

Renault Laguna Rear Suspension Bushes **

18750100

Renault Master / Opel Movano Upper Ball Joint

18750200

Renault Master / Opel Movano Lower Ball Joint

18750300

VW Golf 3 Rear Suspension Bushes

18760100

VW Golf 4 / Audi A2 & A3 Rear Suspension Bushes

18760200

VW LT & Mercedes Sprinter Ball Joints

18760300

VW T4 Ball Joints

18760400

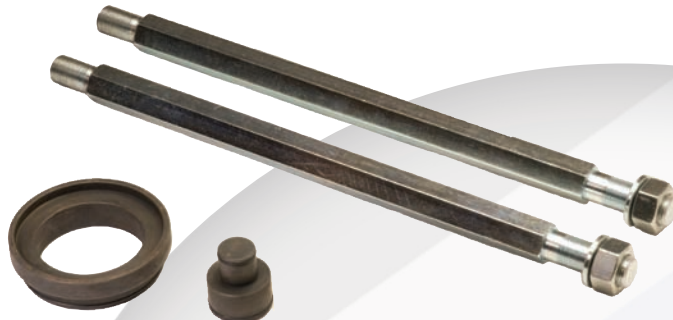

** NB 18750100 - Renault Laguna is supplied with a threaded spindle, nut and bearing

These Individual Press Piece Sets should be used with the Universal Press Frame 18700000 (above) or with the Universal C Clamp 18780200 (ref page 25), but can also be used with the Universal Press & Pull Sleeve Set 08780000 (ref page 26)

Extension Set for Universal Press Frame 18780100

When using the Universal Press Frame 18700000 in conjunction with the Universal Press & Pull Sleeve Set 08780000, it is recommended to increase the capacity of the Press Frame, by fitting the Extension Set 18780100 in order to access the full range of applications available.

18780100 Extension Set

18780100 fitted to Universal Press Frame for use with Press & Pull Sleeve Kits

Universal C Clamp 18780200

A Universal Clamp for the dismantling and installation of suspension parts - on the vehicle.

- A specially designed Universal Clamp for use with the '878' / '879' Series Press & Pull Sleeve Kits
- Designed to allow greater access in restricted situations, and where the Universal Press Frame (18700000) is not suitable.
- A special 'trapezoidal' threaded screw, allows for the application of greater force, and the tool can, therefore, be used with Impact Air Wrenches, as well as with standard ratchets / wrenches etc, thus allowing for both greater speed of use and greater force to be applied making the job of removing stubborn bushes even easier.
- This new C-Clamp tool is also capable of accepting the renowned Sykes-Pickavant 1500 Series Hydraulic Ram, which allows for extremely smooth application of force where avoiding risk of damage to components is critical.
