## Automotive Body Repair & Paint Refinishing

### Automotive Body Repair & Paint Refinishing

The repair and refinishing of modern car bodies has become a sophisticated process. The modern automotive body technician needs a wide range of skills to be able to repair and repaint them.

This course is an ideal starting point if you wish to pursue a career in vehicle body repair or paint refinishing. As well as covering the technology involved in body construction, engine, transmission and chassis of the motor vehicle, you will put the theory you learn into practice.

- Vehicle Technology for Accident Repair
- Working Safely and Effectively
- Vehicle Technical Information
- Forming, Joining and Measuring
- Vehicle Body Repair Materials
- Basic Body Repairs
- Basic vehicle preparation
- Moving Loads and Vehicle Jacking
- Vehicle refinishing materials, tools and equipment
- Vehicle paint application and minor defect rectification

The course is taught in our specialist vehicle body repair and refinishing workshop. As you learn, you will be assessed on your ability to complete set practical assessments and record information in a portfolio.

This course will give you an insight into the automotive body repair industry as well as providing progression opportunities to higher level courses and employment.
