Land-based
Service Engineering

Land-based Service Engineering

On this highly flexible course you will have the opportunity to learn workshop practices, fabrication, joining and welding and the skills you need to maintain small engine & 4 x4 vehicles; land based machinery and equipment.

This programme is a good starting point for those who are relatively new to agricultural engineering and who want to work in the agricultural machine maintenance or Land-based Service Engineering sectors.

The course offers a broad introduction to machinery and vehicle maintenance with progression routes to higher level courses.
